

LARGE EXPANSION VERTICAL HONE

TYPE: **CORRECT420S-M**

SIZE RANGE Ø 42,0 – 70,0 mm

Honing unit for diameter included from 42 to 70mm. The rack expansion system allows to use different kind of Stone sets, composed by **two (2) stone holders** plus **two (2) guide shoes** of 80 mm length, to completely cover the size range.

Unique of this kind, it can be assembled with DOUBLE STONE SETS, called ED2 – ED3, particularly suitable for the honing of motorcycle cylinders with very wide radial opening and or of small and medium sizes. Available abrasives for roughness and finishing for all materials. Available **DIAMOND** abrasives for Nickel Plated cylinder liners.

It is available in two models:

MANUAL (M) – To apply on column drills, radial drills, electrical drills, lathes.... In this case the operator has to interrupt the honing operation to increase the expansion of stone sets acting on central pinion. Available with Morse connection or at customer request.

AUTOMATIC (S) – To apply on vertical hones; the operator increases the expansion actin directly on the machine wheel. Available with clutch for the machines of the best brands (Sunnen, Delapena, Berco, Robbi, Vereco, AMC, Kwik-Way, Rottler).

CORRECT-420S

CORRECT-420 M

HONE	DIAMETER mm	STANDARD STONE SETS	DOUBLE STONE SETS	ABRASIVE LENGHT
